WORK EXPERIENCE

Luminis 2017 - now
Software Engineer / Consultant Arnhem

Responsible for consultancy and development on site. Main area of focus; frontend development, devOps. Customers involved: Ohra/Nationale Nederlanden, Iddink, LinkNL, Remeha BDR, Jifeline, HIMMS

Browsy 2017 - 2021
Software Engineer / Co-founder / CTO Nijmegen

Responsible for anything technical in the business. Main area of focus; frontend development, backend development, devOps.

Hippo H.R. 2015 - 2016
Junior Web Developer Boxmeer

Responsible for enhancing the mobile experience of the users of uitzendbureau.nl. I've done mainly front-end as well as back-end web development. The work included

designing and implementing new features within the product uitzendbureau.nl. Resolving bugs, improving the developer process, and improving the user experience were also among the tasks.

Donders Institute for Brain, Cognition and Behaviour	2012 - 2013
IT Manager	Nijmegen

I helped students and employees in person on business related to IT. Installing software, hardware, give recommendations, fix issues, set up new workspaces and answer questions.

Pantein Zorggroep	2011 - 2012
IT Manager	Uden

I helped employees by phone on IT related business. installing software, hardware, give recommendations, fix issues, set up new workspaces and answer questions. It was also possible I had to drive to a specific location to fix one or multiple issues on location.

EDUCATION

Aarhus Universitet	2016
Bachelor Informatics – Application Development	Aarhus, DK

Minor applied app development. This minor is all about mobile devices and applications in combination with embedded systems. I'm following this minor in Aarhus, Denmark as part of the Erasmus program.

HAN Hogeschool van Arnhem en Nijmegen	2013 - 2017
Bachelor Informatics - Web development	Arnhem

Education that focuses on designing and implementing of software with an emphasis on front and back-end web applications. This also includes the planning and adjustment of the development process and testing of software systems on a functional-, technical and usage level.

ROC Nijmegen	2009 - 2013
MBO Informatics – ICT-Beheer niveau 4	Nijmegen

Practical education that focuses on developing, implementing, and managing information systems, support users and organize a service desk.

Raayland College	2004 - 2009
High school VMBO-T	Venray

VOLUNTARY

Stichting Fabrikaat
IT

2015 - 2016
Nijmegen

Consultant, implementer, and manager for all things related to IT in the organisation.
Think about setting up hosting, managing (web/mail) servers and buy hardware.
